General Remarks:

INTRODUCTION

The Government of India felt the need for a permanent agency to expedite the publication of Standards and development of test facilities in parallel when the work of preparation of Standards is going on, as the development of improved safety-critical parts can be undertaken only after the publication of the Standard and commissioning of test facilities. To this end, the erstwhile Ministry of Surface Transport (MoST) has constituted a permanent Automotive Industry Standard Committee (AISC) vide Order No.RT-11028/11/97-MVL dated September 15, 1997. The Standards prepared by AISC will be approved by the permanent CMVR Technical Standing Committee (CTSC). After approval, The Automotive Research Association of India, (ARAI), Pune, being the secretariat of the AIS Committee, has published this Standard. For better dissemination of this information, ARAI may publish this document on their website.

This Standard prescribes the safety requirements of foot rests for two wheeled motor vehicles.

The purpose of this standard is to regulate the strength requirement for footrest. In preparation of this Automotive Industry Standard, Considerable assistance has been taken from Annex XIII of EU 44/2014 as amended by (EU) 2016/1824, with regard to the Requirements applying to passenger handholds and footrests for the approval of two- or three- wheel vehicles and quadricycles issued by European commission. As decided in 54th AISC Meeting to formulate new AIS on footrests of L1 and L2 category of vehicles.

The AISC panel and the Automotive Industry Standards Committee (AISC) responsible for preparation of this standard are given in Annex C and D respectively.

**Automotive Vehicles - Requirements of Footrests for
Two-wheeled Motor Vehicles**

Paragraph No.	Content	Page No

Automotive Vehicles - Requirements of Footrests for Two-wheeled Motor Vehicles

1.1 SCOPE

This standard specifies the requirements for footrests or a floor or floor boards for L1 and L2 categories of vehicles as defined in AIS-053

1.2 REFERENCES

AIS-053 - Automotive Vehicles -Types - Terminology

1.3. GENERAL REQUIREMENTS

All seating positions of the vehicle shall be fitted either with designated footrests or a floor or floor boards on which both of the rider's or pillion's feet can rest.

1.3.1. Specific requirements

1.3.1.1. The vehicle's floor, each designated floor board as illustrated in fig 3 of Annex B and each designated footrest as illustrated in fig 2 and 3 of Annex B shall be capable of withstanding, without resulting any permanent deformation which is harmful to its function, a vertical compression force of 1700 N (170 kg), applied statically to any point on the floor or floor board or 15 mm from the end of the footrest at a maximum pressure of 2.0 MPa.

1.3.1.2. In cases where an additional side saddle footrest as illustrated in fig.1, 2 and 3 of Annex B is provided for Pillion rider, it shall be capable of withstanding, without resulting any permanent deformation which is harmful to its function, a vertical compression force of 1000 N (100 kg), applied static load on the total surface area of the footrest, at a maximum pressure of 2.0 MPa.

1.3.1.3. The space provided by each designated footrest including the space on the floor or floor board, shall be sufficient for a foot at least 300 mm long and at least 110 mm wide to be placed safely without hampering the vehicle operator's feet. Footrests shall be located so that no direct contact between the foot/leg and rotating parts (e.g. tyres) of the vehicle is possible when in use.

Note: The each designated space (not necessarily a rectangle) requirement for the floor/floorboards shall be specified as per manufacturer's design and details of the same to be submitted to test agency.

1.3.1.4. Pedals enabling the vehicle to be propelled by the rider's muscular leg power are deemed to meet the requirements of points 1.3.1.1. and 1.3.1.3.

- 1.3.1.5. The maximum pressures mentioned in points 1.3.1.1. and 1.3.1.2. may be exceeded during testing upon agreement with the vehicle manufacturer.
- 1.3.1.6. Virtual testing using an appropriate software is permitted for verification of compliance of the above requirements. A virtual testing method should provide for the same level of confidence in the results as a physical test. Therefore, the testing agency shall properly validate the mathematical models used.

1.4. APPLICATION FOR TYPE APPROVAL

- 1.4.1. The application for type approval of a vehicle type with regard to designated footrest, Floor/Floorboard shall be submitted by the vehicle manufacturer along with at least the details given in Annex A.

Note: If the above details are covered in application for complete vehicle type approval, it is not necessary to submit them separately.

- 1.4.2. Every modification in technical specifications affecting type approval declared in accordance with 1.4.1, shall be intimated to the testing agency.

- 1.4.3. Testing agency may then consider, whether;

- 1.4.3.1. The footrest, Floor/Floorboard with modifications complies with specified requirements, or,

- 1.4.3.2. Any further document verification is required.

- a) In case of 1.4.3.2, checks for those parameters, which are affected by the modifications only needs to be carried out.
- b) In the event of 1.4.3.1 or in the case of 1.4.3.2 after successful compliance to requirements, the certificate of compliance shall be validated for the modified version.

- 1.4.4. For deciding whether any further verification is required, guidelines of clause no. 1.4.4.1 and 1.4.4.2 shall be followed :

- 1.4.4.1. In the cases further testing is required

- a) Sectional dimensions of the footrests / floor / floorboard used on other models/variants are reduced
- b) Size and number of fasteners used in attachments is reduced.
- c) Change of Material of the footrests / floor / floorboard

- 1.4.4.2. In all other cases the testing need not to be carried out

ANNEX A
(Clause 1.4.1)

INFORMATION TO BE SUBMITTED BY THE MANUFACTURER

A-1	General	
A-1.1	Make	
A-1.2	Type (state any possible variants and versions: each variant and each version shall be identified by a code consisting of numbers or a combination of letters and numbers):	
A-1.3	Vehicle category as per AIS-053	
A-1.4	Name and address of manufacturer	
A-1.5	Name and address of manufacturer's authorized representative, if any:	
A-2.0	Type of Footrest (Footrest / Floor / Floorboards)	
A-2.1	Number of Footrest / Floor / Floorboards	
A-2.2	Length of the Footrest / Resting area (Length and Width) of the foot on Floor / Floorboards	
A-2.2.1	Method of attachment of Footrest / Floor / Floorboards (Bolted / Welded)	
A-3.0	Photographs or drawings showing the location and the construction	

ANNEX B

(Clause 1.3.1. – Illustrative picture showing example of designated footrest, Side saddle footrest, floor/floorboard)
